<blockquote><p>Australia's Smartest TRADIE</p></blockquote> <p>SMART CHOICE
 Welcome to the well-balanced world of the turbo diesel Actyon Sports Ute ♦ Australia's Smartest Tradie. Tough enough to tackle anything but without breaking the bank, it's longer, wider and taller than before with a ladder frame chassis and deep tub. With superior road handling and improved noise vibration technology, it's so quiet to drive you could be forgiven for thinking you were behind the wheel of a high powered sedan, rather than a workhorse. Which means whatever you ask it to do, the Actyon Sports Ute quietly goes about its business posting fuel figures as frugal as 7.3 litres per 100km* and CO2 emissions from 192g/km*. Add to this as much vroom up front as there is room in back, and you can see why Tradies everywhere think the Actyon Sports is a real beaut ute.</p> <p>SMART MOVE
 Sporting a two-litre turbo-charged diesel engine that's as frugal as it is powerful, the Ssangyong Actyon Sports Ute develops 114kW of power and 360Nm of torque, so it's got plenty of towing power. As at home on the worksite as it is at the campsite, its coil spring multi-link rear suspension always gives it a class-leading ride. Add to that a choice of 4X2 or 4X4 with high and low range, six-speed manual or six-speed automatic transmission ♦ the latter being an Australian-built unit ♦ and you'll no doubt agree the Actyon Sports Ute is as reliable, fuel efficient and as trustworthy as a blue heeler.</p> <p>SMART LOOKS
 Once inside the cabin of the Actyon Sports Ute you could be forgiven for believing you were driving a sports sedan. With everything at your fingertips ♦ including Bluetooth phone connectivity with wireless music streaming, MP3 player, USB connection and multi-function trip computer that measures your travel distance and fuel consumption ♦ it's never been more comfortable working hard and playing harder. Fresh cabin features have been installed everywhere to enhance comfort and enjoyment for you, your family and your workmates. From an eight-way adjustable driver's seat, to ISOFIX child-seat anchors right across the range and a climate control system on the SPR, there's absolutely nothing utilitarian about the level of comfort inside the Actyon Sports Ute range.</p> <p>SMART MANOEUVRE
 Giving you the choice of 4X4 on all models, the Actyon Sports Ute can adapt to any environment ♦ whether it be the workplace or playground. With a deep tub tray and a cargo bed that measures two square metres, there's loads of room for tools of the trade as well as toys for the boys. Capable of towing loads as heavy as 2,300* kilograms, this rugged off-roader will never make hard work of going on holiday.</p> <p>SMART RANGE
 Along with a quiet, car-like ride and creature comforts as standard, comes an impressive list of quality interior options. From cool cloth interior and Bluetooth with music streaming as standard on the Tradie, to the full leather trim, Electronic Stability Control, and ABS on the SPR, the Actyon Sports Ute range has got more options, accessories and features available than you could shake a jackhammer at.</p> <table border="0" width="870" cellpadding="0"> <tr><td colspan="2" height="15"></td></tr> <tr><td valign="top" width="220"></td><td valign="top" width="650"> <h5>Actyon Tradie 4x2/4x4 </h5>
